CAREER APPAREL + ESSENTIALS

TO FIND CORRECT SIZING, FOLLOW THE BELOW EASY STEPS...

- * Have someone measure you, keeping the tape snug but not tight.
- * Match measurements with the correct size listed in the size charts.
- * If the measurements fall between two sizes, order the larger size.

- 1 HEIGHT: Stand against a wall in stocking feet. Measure from top of head to floor.
- 2 CHEST/BUST: Measure around fullest part of chest/bust keeping tape under arms and across shoulder blades. Arms should be relaxed at sides.
- 3 WAIST: Measure around waist at the height pants are normally worn. Keep one finger between tape and body. Take the measurement over a shirt, but not over pants. For belts add 2" to the waist measurement.
- 4 HIPS: Stand with heels about 6" apart and measure around fullest part of seat/hip.
- 5 TORSO: Measure from high point of shoulder at front down through legs and back up to starting point.
- 6 INSEAM: In stocking feet, stand with feet slightly apart and measure inside leg from center crotch to floor.
- SLEEVE: Bend elbow and place hand on hip. Hold tape on outside shoulder ridge to bent elbow and down to wrist.
- SHOULDER: Measure across back, from one outside shoulder ridge at widest point to the other ridge.
- NECK: Using a shirt with a collar that fits well, lay the collar flat and measure from center of collar button to far end of collar button hole.
- HEAD (FOR HATS): Wrap a tape measure around head approximately 1/2" above ears and across forehead.
